IDENTIFIERS Hawaii

ABSTRACT

Summary data of all current grade point ratios earned by students are presented by program and grade distributions are presented by subject areas for the seven community colleges of Hawaii for fall 1977. Overall, the average grade assigned was the same as fall 1976 at 2.8 with liberal arts students averaging 2.82 and vocational students 2.77. The credits-earned rate was 73%, the highest in five semesters, with credits-earned rates of 77% for vocational and 71% for general education courses, and with rates by subject area ranging from 69% in natural sciences to 85% in technology courses. Credit/no-credit designations comprised 2% of assigned grades, 1-2% less than in previous semesters, non-punitive withdrawals (W) represented 9%, and incompletes (N) represented 13%. By individual college the data showed an average grade range from 2.6 to 3.2, a credits-earned rate increase for six campuses, and fewer W and N grades at most colleges than in previous semesters. Statistical tables present grades and credits-earned summaries by campus, by major, by educational objective and by semester for spring 1975-fall 1977. (RT)

Introduction

This brief report is a summary of data on current grade point ratios earned by students, by program, as well as the distribution of grades assigned in the various subject areas. Information such as this are helpful in examining campus grading practices and in planning and assessing academic programs.

Source

Computer reports 2528 and 2529 were used as the source documents for this report. (These reports are on file in the registrar's office at each campus.) They are generated at the end of each semester after all of the grades have been submitted.

Population Included

The data include the grades given to and earned by all students registered for credit classes, i.e., regular students, special students (early admits and concurrent registrants), students in credit courses offered by continuing education as well as students who registered for the first time in the second-eight week session.

Highlights

Tables I and II: Distribution of Grades and Average Grades Assigned

1. Community college totals for Fall 1977 show:

- a. The average grade assigned this fall was the same as last fall, 2.8.
- b. The credits-earned rate was 73 percent, the highest in the five semesters included in this report. As in previous semesters:

- (1) credits-earned rates were higher for vocational courses (77 percent) than for general education courses (71 percent);
- (2) rates ranged from 69 percent (natural science courses) to 85 percent (technology courses), by subject area.

- c. Two percent of the grades this fall were credit/no-credit designations. (They comprised 3-4 percent of the grades in previous semesters.)

- d. A varying pattern for the two forms of non-punitive grades given by the colleges: the "W" and "N" grade designations.
 - (1) As in Fall 1976, "W" designations comprised 9 percent of the grades. (The data show the "W" rate declined from 13 percent in Spring 1975.)
 - (2) "N" grades comprised 13 percent of all grades assigned, compared to 14 percent last fall. Over half of these "N" grades were in transfer courses (courses numbered 100 and over).
2. The data, by college, show:
 - a. Average grades given ranged from 2.6 to 3.2.
 - b. Credits-earned rates increased for six campuses.
 - c. Proportionately fewer credit/no-credit and "N" grades were given at most of the colleges.

Table III: Current GPRs by Major and Educational Objective

The current mean GPR of 2.81 earned by community college students is the lowest since Spring 1975 (2.95). As in the past semesters, Liberal Arts students earned higher GPRs (2.82) than vocational education majors (2.77). Unclassified and special students earned the highest GPRs, probably due to the lighter credit loads they carry.

Summary

The data for Fall 1977 show higher credits earned rates, but lower current grade point ratios for the students. To what extent do the data reflect shifting views on grading practices?
